

8x8x16 Standard Mid-Split

Mid-Split 1-Side 1-End

Inside Split Face Corner

Features

With just half the face in a split texture, Mid-Split CMU provide design effects without projections. Used as a field, a running bond installation creates a checkerboard pattern; in stack bond, vertical striations. Inserted in a field of typical precision or split face units, the Mid-Split can add accents at random, or in phasing patterns. This unit can also facilitate clean inside corners for split textured walls.

Availability

Special order only. Configurations such as open ends and open end bond beams may be available. Units may be made in any of our integral color options.

Standards

Concrete masonry units manufactured by Angelus Block Co., Inc. meet ASTM C90 Standard Specification for Loadbearing Concrete Masonry Units.

Fire Rating

Solid grouted walls 8-in wide and greater are rated at 4 hours, per CBC Table 721.1(2). For partially grouted walls, depending on the specified weight classification, 8-inch wide units are 1 hour to 2 hours, and 12-inch wide units are 2 hours to 3 hours.

Sustainable Features

- This product is included in Type III Environmental Product Declarations for Angelus Block Concrete Masonry Units, specific to location and mix designs, and in one of six *Health Product Declarations*, as applicable for its weight classification.
- Contributes to green rating systems calculations, including Regional Materials, EPDs, and Material Ingredient Reporting.
- Angelus Block CMU help facilitate and support many more strategies and credits, including Optimize Energy Performance, Construction Waste Management, and several within Indoor Environmental Quality. Angelus Block CMU contain no VOCs.
